

USAID
FROM THE AMERICAN PEOPLE

HEALTH FOR ALL (SAÚDE PARA TODOS)

January 2017 – January 2022

Total Funding: \$63 million

The USAID Health for All project supports the Angolan Ministry of Health, the National Directorate of Public Health, the National Malaria Control Program, and the National Institute for the Fight Against AIDS in the effective use of Angola's resources to meet the health needs of its population.

The Health for All project builds on the strong partnership between the U.S. and Angola in the area of health. The project provides targeted evidence-based interventions in the areas of malaria, HIV/AIDS and reproductive health/family planning, improving access to quality health services for the Angolan people.

PROGRAM AREA:

- **PEPFAR** - LUANDA
- **PMI** - CUANZA NORTE, LUNDA NORTE, LUNDA SUL, MALANGE, UIGE, ZAIRE

- **FAMILY PLANNING** - HUMABO, LUANDA

ACTIVITIES

- Train health workers to effectively diagnose and treat malaria cases
- Train technicians on intermittent preventive treatment of malaria in pregnancy using sulfadoxine-pyrimethamine as well as on case management during pregnancy
- Support integrated case management of malaria at the community level
- Support Angola's National Institute for the Fight against AIDS in the implementation of HIV/AIDS continuum of care strategy under Test & Start strategy (starting anti-retroviral treatment regardless of clinical or lab status) in 7 hospitals in Luanda
- Promote best practices for prevention, treatment and control of HIV/AIDS
- Generate demand for family planning and reproductive health services through improved health messages and behavior change communication
- Improve family planning/sexual and reproductive health services, with a particular focus on youth
- Strengthen institutional capacity of public and private health service providers

EXPECTED ACCOMPLISHMENTS

- 40 percent reduction in malaria through nationwide insecticide-treated net distribution campaigns and improvement of the quality of clinical malaria services
- 90 percent of people living with HIV placed on treatment in Luanda with the establishment of a sustainable model for quality HIV/AIDS services
- 30 percent to 53 percent increase in national use of contraceptives as a result of high-level technical assistance in family planning/sexual and reproductive health
- Technicians' capacity to develop and monitor health budgets at the provincial and municipal level to develop and monitor health budgets will be strengthened
